Human Functional Interactions (FIs)

Description

Data set with two complete lists of identified functional interaction partners in Human. Data are derived from Reactome and BioGRID databases.

Usage

`data(FIs)`

Format

A list of two data frames with two columns describing interaction partners.

`FIs_Reactome` functional interactions derived from Reactome database

`FIs_BioGRID` functional interactions derived from BioGRID database

Details

The data sets contain unique interaction pairs. Self-loops are not considered.

Value

A list of two data frames.
