

Package: GEOexplorer (via r-universe)

October 17, 2026

Title GEOexplorer: a webserver for gene expression analysis and visualisation

Date 2023/10/31

Version 1.18.0

Description GEOexplorer is a webserver and R/Bioconductor package and web application that enables users to perform gene expression analysis. The development of GEOexplorer was made possible because of the excellent code provided by GEO2R (<https://www.ncbi.nlm.nih.gov/geo/geo2r/>).

loadApp	2
Index	3

loadApp	<i>A Function to Load the GEOexplorer Shiny App</i>
---------	---

Description

This function loads the GEOexplorer Shiny App. The GEOexplorer Shiny App extends GEO2R’s functionalities by enabling a richer set of analysis and graphics to be performed/generated from the gene expression data.

Usage

loadApp()

Value

Large Shiny App

Author(s)

Guy Hunt

Examples

app <- loadApp()
